Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance

The present invention pertains an apparatus, a computer product and a method for reverse order error correction codes. The prior arts, however, does not teach the combination features of calculating error correction code (ECC) syndromes of errors, combining ECC syndromes of data with the ECC syndromes of errors, determining whether the data is correctable based on the combined syndrome and correcting data if the data is correctable. Hence the prior arts of record do not anticipate nor render obvious the claimed inventions. Thus claims 1-20 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
